

TREE PLANTING PROJECTS

1. EMPOWERING WOMEN

More than 50 women are now involved in the project and they are engaged in tree planting and activities like soap making, candle making and organic gardening.

2. REFORESTATION ALONG THE MARA RIVER

Provided 4000 trees in 2023 to restore the Mara river banks.

3. AGROFORESTRY

Women have been encouraged to raise forest gardens, a combination of a variety of food crops, fruit trees and indigenous trees.

4. SUPPORT SCHOOLS

3000 trees have been planted in 6 schools in the Emarti area and beyond with more than 2000 school-aged children.

WHY WE ARE DOING THIS

The majority of the community members have little knowledge about the importance of trees and the ecosystem services they provide. Women in the Wild have been sharing more knowledge on the activities of the project, to teach more women even outside of the project. The aim is to create more projects in the community and more awareness in the local centres using the Maasai Baraza's.
