Garden Management Services

At Nicholsons, we design, create and manage beautiful spaces for people and the planet.

With a reputation for expert advice, style and quality, Nicholsons provide a holistic approach to environmental services, supporting clients from initial concept through to delivery and management.

Our passionate team of 200 professionals across Oxfordshire, Northamptonshire and Gloucestershire have in-depth industry knowledge, combined with a pragmatic approach to environmental project management.

Our team of professional gardeners offer an array of garden management services, including pruning, weeding, staking and mulching, lawn care, hedge trimming and border maintenance. We undertake site assessments and soil evaluations so your gardener truly understands your garden's advantages and potential challenges.

To achieve the first class results we take pride in at Nicholsons, we champion collaborative relationships between clients and their gardeners. In support, the departmental office team provide an additional point of contact, scheduling garden management visits as well as assisting with resources and plant ordering.

Whether you have a professionally designed garden, a newly planted scheme - or something in between, our team can offer specialist advice and practice to truly make the most of your plants and garden.

It would be our privilege to manage your garden for you.

“

Nicholsons have been working with us for less than a year but already I can't imagine how we would manage without our gardeners, Clare and Stephen, and the brilliant work they do in our garden.

They are both extremely friendly and knowledgeable and very willing to share their thoughts and experiences on plants, trees and vegetables, as well as caring for the wildlife on our patch.

Additional Services

Nicholsons is proud to be a multi-disciplinary organisation and offer services across the breadth of horticultural, landscaping, forestry and environmental works. If you require additional assistance with your garden outside of garden management, [please view our Nicholsons brochure](#) for further information.

In addition to our regular garden management services, we also offer garden consultancy. Please read below to explore the full extent of our consultancy offer.

Garden Consultancy

For gardens requiring rejuvenation or new planting schemes, we offer a bespoke service tailored to your garden's needs.

Our consultancy service provides clients with professional horticultural knowledge alongside expert planting design, offering support with the following areas:

- Rejuvenating existing borders
- The creation of new planting schemes, including boosting seasonal colour, adding bulbs or container planting
- Screening solutions
- Problematic borders with specialist requirements
- Coaching for you or your gardener to get the best outcomes for your garden

Jane Ball, Nicholsons' Gardening Consultant, has worked at Nicholsons for almost 20 years and her extensive plant knowledge and garden management background optimise outcomes for your garden. Jane works collaboratively with clients to develop gardens and is passionate about creating cohesive, beautiful and abundant spaces, working in harmony with any ongoing garden management.

Jane's consultancy rate is £108 per hour (including VAT), including Jane's travel time and mileage within a 30-mile radius of our Oxfordshire office, Jane's time in the garden with you, a summary of her suggestions and any quotations. Up to three revisions are included within this rate.

Any follow-up visits or additional planning would be charged at the same hourly rate.

To find out more about this service, please contact the Garden Management Department on gardenmanagement@nicholsonsgb.com or call the office on 01869 340342.

“

When we moved in, the garden around our house was a little sorry for itself and overgrown, as is often the case when houses change hands and building work needs to be done. Andy, our Nicholsons gardener, has worked tirelessly to bring the lawns and flowerbeds under control.

Above all, Nicholsons have worked closely and attentively with my wife and I to understand our preferences and help us achieve improvements over and above the demanding work of maintenance. The proof of concept was when spring arrived and the garden came to life in a way that was deeply rewarding.

Frequently Asked Questions

At Nicholsons, our philosophy is centred around our values of creativity, dedication and passion for our planet. As such, we uphold standards of practice to support these principles and ensure we continue to provide a high level of service to our clients.

How frequent are my garden management visits?

Your Nicholsons gardener will visit your property for a minimum of one full day (8 hours) a week unless otherwise agreed with the company.

How much do you charge?

£260 per day plus VAT per gardener for a full day's visit- (8hrs). This includes travel time to and from your property.

£290 per day plus VAT for working outside of normal hours- Monday to Friday 7.30am – 4.30pm- which may be required in exceptional circumstances, subject to availability.

We invoice for all gardening at the end of each month and our payment terms are 14 days from date of invoice. This will include any additional plants or materials that have been used for your garden.

Are there any additional charges?

Any additional administration, quotations or planning for your garden will be undertaken in your allocated gardening time. Additional projects outside of ongoing management will be subject to a consultancy fee.

For small to medium sized gardens, the rate includes the use of ready to use sprays; pest, disease and weed sprays, tying-in twine and slug pellets. Any full bottles used will be charged for.

£25 plus VAT per load is charged if a small trailer to remove green waste is required. There is a £65 plus VAT charge per load if a larger trailer is required. Small bags of green waste are removed for free.

There is a £65 plus VAT charge for each visit for a ride on mower if required for large areas of grass cutting, or any additional specialised equipment is needed. We advocate the use of any composting facilities that you have available, however if you do require green waste to be taken away, the gardener will leave your premises in time to be able to travel back to our yard and dispose of the waste by 4.30pm.

Our gardener will usually park their van on your premises. If your residence is in a parking permit area, you will need to provide a permit for parking. If there is a parking meter, please advise of the charges at the time of booking. Any costs incurred for parking will be charged to you through invoicing.

Why is my gardener using their mobile phone / tablet?

On your first visit with our team, a full risk assessment will take place in accordance with our health and

safety policy. Your designated gardener will complete this task using their work phone and it will take around half an hour. The risk assessments will be routinely checked by any gardeners that enter the garden and will be revised accordingly.

At the end of each visit, the gardeners are required to fill out a diary page, logging the work they have undertaken and outlining any sundries used. This will be carried out on a work mobile and will be completed in your allocated time.

During the gardener's day, they will take two half-hour breaks, one in the morning at approximately 10am and for lunch at 1pm (you do not pay for this break time).

Why do I need two gardeners to attend sometimes?

If the gardener is required to work at height for hedge cutting, tree pruning, pond work or any other jobs of this nature, we will organise for two gardeners to attend the garden, which will be charged at an additional full day's rate.

My garden is in a conservation area - do you take special measures?

We will not undertake any work in a conservation area without checking that we are able to do so via the relevant councils' guidelines on conservation practice. If we agree that work needs to be carried out, we will apply to the council for consideration, via our forestry department. Please note that there will be an administration fee for this and that there is a lead time for processing before we can continue. The same is

relevant for Tree Protection Orders (TPOs).

What about biosecurity?

As a company, we take biosecurity very seriously. The gardeners take time in between visits to wipe down their tools, to reduce the risk of contamination and bringing in pests and diseases to the following client's garden.

Box (buxus) blight may take longer than expected to deal with as the gardeners will need to clean their blades after every cut. Buxus clippings and plants which require removal are bagged up and cable tied separately. Waste is disposed of in the general waste - on site, where possible, and not composted.

I need to cancel a visit- what notice should I give?

If you need to cancel a visit, we require one week's notice to avoid cancellation fees. We understand that circumstances change and if at any stage you would like to end your garden management contract, please provide one month's notice.

Do you have a branching out policy?

Our team are under contract to Nicholsons. Please be aware that they are unable to work directly for you and we would be sincerely grateful if you would respect us and our team.

We do offer a recruitment service for very large gardens where a gardener may work under support for the first year, post build. For further details, please contact the departmental office.

“

For three years, Rob has been gardening for me and, hand on heart, I can say he is a gardening magician! His calm, positive and reassuring disposition is a pleasure to work with, and his dedication and enthusiasm for the garden shows in his hard work.

Over time, his understanding of the space has grown and after his visits, the garden always appears to be smiling. I'm so grateful to him!
